Applied Math 247
Linear Algebra I & II

Summer 2008
Tuesdays and Thursdays
7:10 am − 9:00 am

Instructor

Instructor: Darren Atkinson
Office: Bannan Engineering, Room 245
Office hours: TR 9:00 - 10:00 am
Web page: http://www.cse.scu.edu/~atkinson/teaching/su08/247/
E-mail: datkinson@scu.edu

Textbook

Bretscher, *Linear Algebra with Applications*, 3rd ed., 2004.

Grading

Homework: 10%
Exams: 30% each (7/8, 7/31, 8/26)

Overview

We will be covering the chapters 1–8 of the text. Homeworks will be assigned in class and are due the following class. Homeworks will be graded for effort. You need not complete every problem, but you should complete most and attempt all others. The solutions to most problems are provided in the book, so it is your work that is important, not your final answers. The best way to learn the material and prepare for the exams is to do the homework. The exam questions will be modeled after the problems and exercises in the text. No notes, books, calculators, or other aids may be used on the exams.

Policies

Students are bound by the Santa Clara University Academic Integrity Policy and School of Engineering Honor Code. See the course web page for additional policies.
