

Applied Math 210

Introduction to Probability

Winter 2006
Tuesdays
7:10 am – 9:00 am
KENNA 308

Instructor

Instructor: Darren Atkinson
Office: ENGR 245
Office hours: Tuesdays and Thursdays, 1:30 pm – 2:30 pm, and after class
E-mail: datkinson@scu.edu
Web page: <http://www.cse.scu.edu/~atkinson/teaching/210>

Textbook

Ross, *A First Course in Probability*, 7th ed, 2006.

Grading

Homeworks: 10% (every week)
Midterm exam: 40% (2/14)
Final exam: 50% (3/21)

Overview

We will be covering the first four chapters of the text. Homeworks will be assigned each and every week and are due the following week in class. Homeworks will be graded for effort. You need not complete every problem, but you should complete most and attempt all others. The solutions to most problems are provided in the book, so it is your work that is important, not your final answers. The best way to learn the material and prepare for the exams is to do the homework. The exam questions will be modeled after the problems and exercises in the text. No notes, books, or calculators may be used on the exams.
