

Advanced Programming COEN 11

Project 7

Project 7

- ❑ Copy a file onto another reversing the each line

Project 7

- ❑ Your program accepts the name of two files in the command line
 - ❑ It reads the first file, line by line
 - Use fgets for reading the lines
- ```
char *fgets(char *buffer, int size, FILE * fp);
```
- Assume each line has less than 1000 bytes.
  - ❑ Reverse each line using a recursive function
  - ❑ Write each reversed line on the second file

### Project 7

- ❑ Example:  
a.out a b
- ❑ File a has:  
abc def ghi  
mno pqr xyz
- ❑ File b becomes:  
ihg fed cba  
zyx rqp onm
