Empowering the Underserved, One App at a Time

Silvia Figueira
Computer Engineering, Santa Clara University
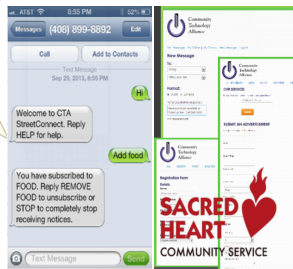

Cellular phones and mobile apps are empowering people in underserved communities.

Problem:
Sending information to homeless people.

Solution:
SMS-based tool to enable service providers to send SMS messages to registered homeless people.

StreetConnect

Helping the Homeless

- Homeless Announcement Tool
- Helping Young Homeless Women

Helping Social Enterprises

- mFarm
- SOKO
- Clinicas del Azucar
- Salauno

Affordable Devices

- HearThat?
- Hearing Aid for Everyone

Problem:
Expensive audiometry equipment not available in underserved communities.

Solution:
Time and cost-effective mobile app to perform audiometric tests.

HearThat?

Problem:
Young homeless women need help, but they are hard to reach.

Solution:
Two mobile apps: one enables health providers to identify them, and the other provides them with info about resources.
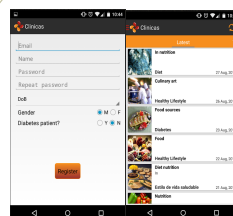

Youth StreetConnect

Problem:
Educating people about diabetes, prevention and treatment.

Solution:
Mobile tool including a web-based repository of articles and an app to browse and read them.

Clinicas Del Azucar

Problem:
Communication with patients.

Solution:
SMS-based tool to send SMS reminders to patients according to the stage of their treatment.

Salauno

Problem:
Expensive hearing-aid devices.

Solution:
App to enable using a cellular phone as a hearing-aid device.

Hearing Aid for All
